

**AMENDMENTS TO THE CLAIMS**

**1. (Currently amended)** A hardenable termite-controlling composition which comprises a hydraulic material and ~~at least one member selected from the group consisting of a soil and a termiteicide~~, and is in the form of a dust-granule mixture,

~~wherein the soil comprises a gravel component and/or a crushed inorganic waste, and the gravel component and the crushed inorganic waste have a particle size of 2 to 5 mm.~~

**2-3. (Cancelled)**

**4. (Currently amended)** ~~A~~The hardenable termite-controlling composition according to claim 1, which is prepared without mixing ~~a~~water.

**5. (Currently amended)** ~~A~~The hardenable termite-controlling composition according to claim 1, wherein the soil ~~further~~ comprises ~~a~~gravel component and a fine grain component, and the weight ratio of the gravel component relative to the fine grain component is 99.9/0.1 to 5/95.

**6. (Currently amended)** ~~A~~The hardenable termite-controlling composition according to claim 5, wherein the fine grain component comprises a sand component and a dirt component, and the weight ratio of the sand component relative to the dirt component is 99/1 to 10/90.

**7. (Currently amended)** ~~A~~The hardenable termite-controlling composition according to claim 1, wherein the soil comprises a crushed inorganic waste which ~~further~~ comprises a termiteicide.

**8. (Currently amended)** ~~A~~The hardenable termite-controlling composition according to claim 1, wherein the weight ratio of the soil relative to the hydraulic material is 95/5 to 70/30.

**9. (Currently amended)** A process for controlling a termite, which comprises ~~at least~~ a step (A) ~~for~~of laying ~~a~~the hardenable termite-controlling composition recited in claim 1 on an area to be treated.

**10. (Currently amended)** ~~A-The~~ termite-controlling process according to claim 9, comprising the step (A) ~~for of~~ laying the hardenable termite-controlling composition on the area to be treated, and a step (B) ~~for of~~ applying ~~at least a~~ water to the laid hardenable termite-controlling composition.

**11. (Currently amended)** ~~A-The~~ termite-controlling process according to claim 10, wherein the step (B) comprises a step (B<sub>1</sub>) ~~for of~~ applying a liquid containing ~~at least a~~ water to the laid hardenable termite-controlling composition, or a step (B<sub>2</sub>) ~~for of~~ laying a concrete or ~~a~~ soil containing ~~at least a~~ water on the laid hardenable termite-controlling composition.

**12. (Currently amended)** ~~A-The~~ termite-controlling process according to claim 11, wherein the liquid applied in the step (B<sub>1</sub>) contains a termiticide.

**13. (Currently amended)** ~~A-The~~ process for controlling a termite, which comprises a step (C) ~~for of~~ mixing a hardenable termite-controlling composition recited in claim 1 with ~~at least a~~ water, and a step (D) ~~for of~~ laying the mixture on an area to be treated.

**14. (Currently amended)** ~~A-The~~ termite-controlling process according to claim 13, wherein the hardenable termite-controlling composition, the water and a termiticide are mixed in the step (C).

**15. (Currently amended)** ~~A-The~~ termite-controlling process according to claim 9, wherein the area to be treated ~~includes-comprises~~ at least one area selected from the group consisting of an infested area, an inhabited area and a breeding area of termites.

**16. (Currently amended)** ~~A-The~~ termite-controlling process according to claim 13, wherein the area to be treated ~~includes-comprises~~ at least one area selected from the group consisting of an infested area, an inhabited area and a breeding area of termites.

**17. (New)** The hardenable termite-controlling composition according to claim 1, wherein the gravel component and the crushed inorganic waste have a particle size of 2 to 3.5 mm.

- 18. (New)** The hardenable termite-controlling composition according to claim 1, further comprising a fine-grained component, wherein the fine grain component comprises a sand component having a particle size of 0.2 to 2 mm.
- 19. (New)** The hardenable termite-controlling composition according to claim 1, further comprising a termitecide in a formulation of a microcapsule.
